# Voisus Solo<sup>TM</sup>

## Complete Virtual Comms Environment for Training at the Point of Need

A standalone application that installs on your Windows desktop or laptop. Compact and portable, Solo can adapt to any training scenario. No extra hardware required. Back up, restore, import, and export settings to different systems, or define multiple roles with different radios. Quickly set up simulated radios, intercoms, and more, creating a comms environment that meets your MS&T needs.

This low-cost, low-maintenance option interoperates with all ASTi products and DIS-based training applications.

Integration is simple, making it easy to add high-fidelity radio simulations and comms to VR devices and NextGen training environments.

## FEATURES & CAPABILITIES

- VoIP, RoIP, PSTN, and intercom
- Customer-furnished equipment, government furnished equipment, and thin client compatibility
- Voisus client SDK for custom GUI development
- Virtual comms environments
- Support for multiple joysticks and foot switches
- Advanced radio skin library
- A Comm Plan with customizable radio frequencies, modulations, and audio codecs
- Customizable DIS radio features (e.g., entity attach)
- Simultaneous communication on multiple radios
- Windows compatibility
